

Bryophytes

This is the list of Mosses and Liverworts as supplied by Johnny Turner who carried out a survey on 21st of December 2012. Johnny stated that the sphagnum bog needs further investigation when the water level drops.

We thank Johnny for this important contribution to the Reserve's records.

Cromwell Bottom 21/12/12

Mosses

Amblystegium serpens

Atrichum undulatum

Aulacomnium palustre

Barbula convoluta

Brachythecium rutabulum

Bryum capillare

Didymodon insulanus

Didymodon rigidulus

Calliergonella cuspidata

Ceratodon purpureus

Cratoneuron filicinum

Cryphaea heteromalla

Dicranoweissia cirrata

Dicranum scoparium

Eurhynchium striatum

Fissidens bryoides

Funaria hygrometrica

Grimmia pulvinata

Hypnum andoi

Hypnum cupressiforme

Hypnum resupinatum

Kindbergia praelonga
Mnium hornum
Orthotrichum affine
Orthotrichum diaphanum
Orthotrichum lyellii
Orthotrichum pulchellum
Orthotrichum striatum
Orthotrichum tenellum
Polytrichum commune
Polytrichum formosum
Poltrichum juniperinum
Pseudoscleropodium purum
Rhytidiadelphus loreus
Rhytidiadelphus squarrosus
Schistidium crassipilum
Sphagnum palustre
Sphagnum squarrosum
Tortula muralis
Syntrichia ruralis
Ulota bruchii
Ulota phyllantha
Weissia controversa

Liverworts

.Fullania dilatata
Lophocolea bidentata
Metzgeria furcata
Metzgeria violacea
Radula complanata,
